Subject Index

Volume 40

Absorptiometry, lean-fat composition and mineral mass, 834
Absorption
  bioavailability of zinc in infant formula, 1064
  oxalate, from oxalate-rich foods, 1007
Acarbose, modification of weight gain, in refeeding (rat), 270
Adrenoleukodystrophy, dietary restrictions (human), 277
Aging, measurement, human red cell Na^+,K^+-ATPase activity, 339
Alcohol, relationship to HDL cholesterol (Beltsville study), 1338
Amberlite XAD-2, determination, human fecal bile acids, 957
American Heart Association, diet-heart statement, 654
Amino acid
  availability, mechanically separated meat and poultry, 704
  brain, neutral, effects of aspartame and glucose (rat), 1
  composition data
    "scoring" procedures, 737
    use for regulatory purposes, 737
  free, changing patterns during lactation (human), 303
  valine, leucine metabolism, stable isotope study, 1224
Anemia
  change in lifestyle among !Kung San, 1295
  iron-deficiency, food fortification, 662, 663
  sickle cell, vitamin B_6 deficiency (human), 235
Announcements, 668, 877
Anorexia nervosa
  body composition changes during recovery, 1137
  dietary patterns, 251
  excretion of urinary catecholamine metabolites, 1001
  ratio, total body water to total body potassium, 260
Anthropometry, assessment, nutritional status, adults and elderly, 808
Antibodies, monoclonal, evaluation for serum ferritin measurements (human), 346
Antibody affinity, tetanus toxoid immunization in protein-energy malnutrition (human), 131
Apoplipoprotein
  B and A-1, responses to carbohydrates (monkey), 485
  C-II and C-III, effects of guar gum (human), 1165
Appetite suppression, and fever (rat), 310
Arrhythmia, and very low calorie diets, 14
Ascorbic acid, effect on iron absorption, soy- and milk-based infant formula, 522
Aspartame, effects on brain neutral amino acids (rat), 1
Atherosclerosis, effect of skim milk and yogurt (rabbit), 479
Bean intake, hypocholesterolemic effect (men), 1146
Behavior modification, guidelines, weight control programs, 865
Bile acid
  binding to dietary residues, vegetarians and nonvegetarians, 947
  fecal
    colon cancer, Seventh-Day Adventists, general population, 937
    determination, with Amberlite XAD-2, 957
Biliary atresia, corrected, vitamin E deficiency in children, 246
Bioassays (rat studies), questionable validity for assessing protein quality, meat and poultry, 675
Biochemical parameters, blood, urine, vegetarians and nonvegetarians, 917
Birth weight
  effect of adolescent growth of mother, 801
  effect of WIC supplemental feeding, 579
  interaction, subsequent weight gain (human), 1120, 1121
Blood glucose, effect of bran in humans, 1023
Blood lipids
  animal fat substitution, "Mediterranean" diet, 1027
  comparison, beef and plant proteins, in humans, 982
Blood pressure, dietary potassium and sodium, one-year study, 1390
Body composition
  changes, recovery from anorexia nervosa, 1137
  effect of exercise during refeeding (rat), 1011
  identical oral and intravenous nutrition (rat), 107
  infrared interactance, 1123
  isotope dilution analysis, 847
  measurement, total body water, total body potassium, in anorexia nervosa, 260
  new standards of measurement, adults and elderly, 808
  total, by dual-photon (^{153}Gd) absorptiometry 834
  two different models, nuclear techniques (human), 255
Body fat
  determination
    by absorptiometry (human), 834
    by in vivo neutron activation (human), 255
Body mass indices, adult obese, similarity, 659, 661
Bone formation, endochondral, and zinc deprivation (monkey), 1192, 1203
Book Reviews, 187, 665, 875, 1307
Bowel, small, copper absorption after resection (rat), 528
Brain, development, dietary fish oil and human milk, 780

The American Journal of Clinical Nutrition 40: DECEMBER 1984, pp 1311–1317. Printed in USA

© 1984 American Society for Clinical Nutrition

Bran
effect on glucose metabolism in diabetics, 66
sorghum and wheat, colonic functions (human), 776

Calcitonin, elevated, in lactating women, 562
Calcium
balance, in very low calorie diets, 14
effect on phosphorus metabolism (human), 219
effect on zinc metabolism (human), 1213
levels, Seventh-Day Adventists, 896
metabolism, during lactation (human), 562
Calcium/phosphorus balance, self-selected diet, Beltsville study, 1368
Calciuria, total parenteral nutrition (rat), 101
Calorie intake, self-selected diets, Beltsville study, 1361
Calorimetry, metabolism during hyperalimentation (human), 116
Cancer, colonic
Amberlite XAD-2 in determination of human fecal bile acids, 957
analysis of food samples, 914
binding of bile salts to dietary residues, 947
biochemical parameters in blood and urine, 917
concordance of nutrient information, 906
diet in vegetarians and nonvegetarians, 880
determination of fiber and fiber constituents in food and stool, 961
dietary cholesterol, β-sitosterol, and stigmasterol, 927
fiber, composition, intake, and excretion, 942
metabolism of bile acids, 937
nutrition intake, 880, 895
population, demographic and anthropometric characteristics, 887
relationship of diet to serum lipids, 921
separation of cholesterol-cholestanol pair, in human fecal extracts, 952
Carbohydrate dietary, effect of various sources, plasma glucose and insulin response, 965
Casein, effect on lipid absorption, 1156
Catecholamines, in anorexia nervosa, 1001
Children
California Mexican-American, height, weight, 873
liver retinol and vitamin A deficiency, 146
marginal malnutrition, reduced work capacity, migrant boys (Southern Brazil), 135
Cholestanol, separation from cholesterol (study, colon cancer), 952
Cholesterol
dietary
colon cancer, Seventh-Day Adventists and general population, 927, 931
effect on human blood serum cholesterol, 351
various forms, lipoprotein and apoprotein B and A-I responses (monkey), 485
vegetarian diet, serum lipid changes, 468
Chromatography, high performance liquid, quantification, xanthurenic acid (rabbit), 159
Chylomicrons, absorptive lipoprotein metabolism (rat), 82
Colonic functions, effects of sorghum and wheat bran (human), 776
Comparisons, multiple statistical, in nutritonal research, 183
Copper
absorption, after resection (rat), 528
dietary, status in healthy elderly (humans), 1096
effect on zinc absorption (human), 536
effect of zinc supplementation (human), 743
metabolism in thyroid disease, 26

Diabetes
glucose and insulin response to dietary carbohydrates (human), 965
glycemic response, food digestibility and palatability (human), 1175
insulin-dependent, response to foods, 971
noninsulin-dependent
effects of high dietary fiber (human), 66
response to foods, 971
pump-treated, and dietary fibers (human), 58
report, Clinical Nutrition Research Units, 855
Diarrhea
in vitamin A deficiency, 1090
milk in treatment of protein-energy malnutrition (human), 591, 601
Diet
Caerphily heart disease study, 827
chemical analysis, vegetarian and nonvegetarian, 914
comparison, vegetarian, lactovegetarian, and "normal," 325
diabetic, responses, insulin-dependent, noninsulin-dependent, 971
effects, high fiber breakfast, on glucose metabolism in diabetics, 66
effects of identical oral and intravenous nutrition (rat), 107
fecal composition and serum lipids, 628
high and low risk for colon cancer, 879, 880
lactovegetarian, nutrient intake and health status (human), 325
Mediterranean, substitution of animal fats, 1027
records, effect of duplicate food collection on nutrient intake, 1333
reducing, calcium, magnesium, and phosphate balances, 14
relationship to serum lipids, Seventh-Day Adventists, 921
self-selected
calcium/phosphorus balance, 1368
fiber intake and fecal weight, 1357
sodium, potassium intake and balance (human), 786
serum cholesterol response to dietary cholesterol (human), 351
three-day composite of food samples, vegetarian and non-vegetarian, 914
vegetarian, serum lipid changes, 468
Dietary intake
Beltsville 1-year study
Introduction, 1323
rationale and design, 1323
self-selected, evaluation of long-term records, 1327
Dietary patterns, varying, in anorexia nervosa, 251
Dietary residues, binding of bile salts, Seventh-Day Adventists, 947
Dietary standards, food composition and food consumption data, 184, 185
Dietary studies, method for rapid assessment of sample size, 185
Dietary therapy, restriction, saturated very long-chain

fatty acids, in adrenoleukodystrophy, 277
Diet-heart, American Heart Association, commentary, 654
1,25-Dihydroxyvitamin D, elevated, in lactating women, 562
Disease, myeloproliferative, effect of chronic hypocholesterolemia (human), 95
Doubly labeled water method, comparison, respiratory gas exchange method, energy expenditure (human), 153
Drug administration, and decreased hepatic vitamin A, 1131

Elderly
new standards for weight and body composition measurement, 808
zinc and copper status, 1096
Electrocardiogram, in obese dieters, 1304, 1305
Endotoxin, role of fever in appetite suppression (rat), 310
Energy
absorption in controls and sprue, 771
expenditure
college students, 1264
early and late pregnancy (human), 1258
measurement, doubly labeled water method (human), 153
resting, relationship to age, sex, body cell mass (human), 168
factorial method, intake/balance technique, college students, 1264
nutrient advantage of very preterm milk, 1042
Enzymes
brush border, in thiamin deficiency (rat), 226
glycolytic, effect of refeeding (rat), 270
Equol, dietary phytoestrogens, and soyaprotein, 569
Erratum, 269
Estrogen, dietary soyaprotein, role in hormone-dependent disease, 569
Evaluation, national
editor's technical notes, 462
school nutrition programs
conclusions, 454
data analysis methods, 382
factors affecting student participation, 425
impact on anthropometric measures, 414
impact on dietary intake, 390
impact on family food expenditures, 425
three major field studies, 368
Exercise
aerobic, weight loss, and riboflavin requirements, obese women, 553
effects of commercial dietary supplement on human performance, 586
low-intensity, metabolic responses to meal, 990
thermogenesis in normal and obese men, 995

Fasting
and refeeding, effect of exercise (rat), 1011
effect on sucrose digestion (rat), 758
Fat
animal, substitution in Mediterranean diet, 1027
saturated, effects on absorptive lipoprotein metabolism (rat), 82
unsaturated, effects on absorptive lipoprotein metabolism (rat), 82
Fat globules, in human term and preterm milk, 820
Fatty acid
adaptation, small intestine, after resection, 1235
plasma, variations, Beltsville 1-yr study, 1345
Feces, weight, composition, subjects 18–20 years, 628
Ferritin serum measurement, evaluation of monoclonal antibodies, (human), 346
Fever, role in appetite suppression after endotoxin administration (rat), 310
Fiber
composition, intake, and excretion, colon cancer, Seventh-Day Adventists, 942
crude, in self-selected diet, 1357
dietary
gastric emptying time, human, 647
hypocholesterolemic effects of oat-bran, beans (men), 1146
in pump-treated diabetics, 58
effect of bran on glucose and insulin responses (human), 1023
effect on zinc absorption in men, 1071
neutral detergent, in self-selected diet, Beltsville study, 1357
procedure for determination, in food and stool, 961
Fish oil, dietary, composition of human milk, 780
Folic acid, maternal, effect on human pregnancy, 496
Food
fatty acid and nutrient composition, 277
microfungal, tolerance and nutritional value in humans, 285
oxalate-rich, absorption kinetics (human), 1007
selection, digestibility and palatability, in diabetes, 1175
Food collections, duplication, and effect on nutrient intake, 1333
Formula
infant
bioavailability of zinc, 1064
soy- and milk-based, ascorbic acid and iron absorption, 522
various, and plasma zinc concentration, 1304

Gas excretion, influence of legume consumption (human), 48
Gastric stapling, gastrointestinal response in a rat model, 293
Gastroplasty, weight reduction; glucose and lipid metabolism, 1273
Gel test meals, quantification of gastric emptying, 647
Glucose
effects on brain neutral amino acids (rat), 1
response, comparison of carbohydrate sources, in human diabetes mellitus, 965
tolerance test, seasonal, Beltsville study, 1352
Glycemic index
classification of dietary carbohydrates, 965
food digestibility, palatability, in diabetes, 1175
responses to foods, 971
Growth
adolescent, in pregnancy, effect on newborn, 801
retardation
intestinal maturation (rat), 1243

Growth—*Continued*
zinc deprivation, pregnancy, infants (monkey), 1202
Guar gum, effect on plasma lipoproteins (human), 1165

Hair, zinc analysis, 840
Heart disease
diet, smoking, social class, and body mass index, 827
report, Clinical Nutrition Research Units, 855
Hookworm, iron-deficiency anemia, 662, 663
Hormone
parathyroid, elevated, in lactating women, 562
thyroid, seasonal variation, Beltsville study, 1352
Hydrogen gas, excretion, after fasting (rat), 758
Hyperalimentation, respiratory, cardiovascular, and metabolic effects (human), 116
Hypercalciuria in total parenteral nutrition (rat), 101
Hypocholesterolemia
comparison of beef and plant proteins, blood lipids (human), 982
effect of oat-bran or bean intake (men), 1146
familial, vitamin E, 747
in myeloproliferative disease, effect on distribution of plasma and erythrocyte tocopherol, 95
Hypertension, and Na^+,K^+-ATPase inhibitor in tea, 36

Immunoglobulin A, and human milk, preterm, 465
Infant
formula
bioavailability of zinc, 1064
soy- and milk-based, ascorbic acid and iron absorption, 522
growth, effects of WIC program, 1250
nutrient advantage of very preterm milk, 1042
nutrition, vitamin C and lactation, 1050
premature
dietary bioavailability of zinc, 72
evaluation of vitamin E status, 1078
immunoglobulin A level in human milk, 465
loss of vitamin A to plastic intravenous infusion devices, 8
vitamin D_2 and D_3 metabolites in D_2-supplemented pregnancy, 1057
Infrared interactance, estimation of body composition 1123
Insulin
response
comparison of carbohydrate sources, human diabetes mellitus, 965
to meal, rest or low-intensity exercise, 990
Intestine, small, adaptation to free fatty acids after resection, 1235
Iron
absorption
from legumes, in humans, 42
soy-based and milk-based infant formulas, 522
effect on zinc absorption (human), 536
fortification, in anemia, 662, 663
intake and status, self-selected diet, Beltsville study, 1393
levels, Seventh-Day Adventists, 896
maternal, effect on human pregnancy, 496

!Kung San, lifestyle, effect on nutrition, 1295

Lactation
calcium metabolism (human), 562
diet and pantothenic acid content (human), 317
fat globule size distribution (human), 820
human milk nonprotein nitrogen components, changing patterns, 303
vitamin C in human milk, 1050
within-feed and between-breast variation (human), 635
Lactose
intolerance, protein-energy malnutrition, 591, 601
malabsorption, pasteurized yogurt, 1219
Legumes
gas excretion (human), 48
iron absorption in humans, 42
Leucine metabolism, regulation, stable isotope study, 1224
Lipid
absorption, soy protein and casein intake, 1156
analysis, preterm breast milk, 1103
plasma, athletes, 360
Lipoprotein
absorptive, effects of dietary fat, saturation, and cholesterol (rat), 82
effects of guar gum (human), 1165
high-density, and vitamin C, Beltsville study, 1338
response, effect of carbohydrate type (monkey), 485
Liver retinol, and vitamin A deficiency in children (Brazil), 146

Magnesium
balance
in very low calorie diets, 14
self-selected diet, Beltsville study, 1368
Malnutrition
effect on resting energy expenditure (human), 168
indices of nutrient absorption (human), 591, 601
marginal, reduced work capacity, migrant adolescent males, Southern Brazil, 135
protein-energy, and dietary lactose, 591, 601
Manganese metabolism, in thyroid disease, 26
Markers for gel test meals, 647
Mass spectrometry analysis, in energy expenditure measurement (human), 153
Meat, mechanically separated, protein digestibility and bioavailability of amino acids, 704
Mediterranean diet, blood lipids, substitution of animal fats, 1027
Metabolic diseases, report, Clinical Nutrition Research Units, 855
Metabolic rate, response to meal during rest and low-intensity exercise (human), 990
Metabolism
basal, reevaluation of Harris Benedict equation, 168
colon cancer, human, 880
during hyperalimentation, (human), 116
neutral sterols, non-vegetarians and Seventh-Day Adventists, 931
Microfungal food, tolerance and nutritional value (human), 285
Milk
cultured, lactose malabsorption (human), 1219
human
and dietary fish oil, 780
changing patterns of free amino acids and urea, 303
content of pantothenic acid, 317

immunoglobulin A level, 465
phospholipid composition, term and preterm, 1103
preterm, nutrient advantage, 1042
term and preterm, fat globules 820
vitamin C in lactation, 1050
within-feed and between-breast variation, 635
in protein-energy malnutrition, 591, 601
skim, and atherosclerosis, (rabbit), 479
Minerals, commercial supplement, effect on human performance, 586

Na^+,K^+-ATPase
inhibitor, in tea extracts, 36
relationship to aging (human), 339
Neurodegenerative disorders, diet restricting saturated long-chain fatty acids, 277
Neutron activation, in vivo determination, body fat (human), 255
Newborn (*see* Infant)
Nitrogen
balance
severe caloric restriction, 611
self-selected diets, Beltsville study, 1361
Norepinephrine metabolites, reduced, in anorexia nervosa, 1001
Nutrient density, comparisons, Beltsville 1-yr study, 1327
Nutrient intake
colon cancer, Seventh-Day Adventists and general population, 880, 896
concordance of information (obtained by different methods; humans), 906
Nutrition
adults, elderly, new standards of weight and body composition measurement, 808
assessment by isotope dilution analysis, 847
deprivation, and reduced work capacity, migrant adolescent boys (Southern Brazil), 135
effects of nearly identical oral and intravenous support (rat), 107
iron, folate, vitamin B_{12}, in !Kung San, 1295
legume seeds and gas excretion, 48
multiple statistical comparisons in research, 183
report, Clinical Research Units, 855
total parenteral
hypercalciuria and negative calcium balance (rat), 101
improved intravenous vitamin A delivery, premature infants, 8
WIC, supplementation, effect on birth weight, 579
Nutritional assessment, isotope dilution analysis, body composition, 847

Oat bran, hypercholesterolemic effects, in men, 1146
Obesity
body fat estimation, infrared interactance, 1123
body protein loss, severe caloric restriction, 611
gastrointestinal response to gastric stapling (rat), 293
gastroplasty, and glucose and lipid metabolism, 1273
guidelines for weight control programs, 865
measurement of diet-induced thermogenesis in women, 542
similarity of indices, adult population, 659, 661
thermogenesis during exercise, 995
Oxalate absorption kinetics (human), 1007

Pantothenic acid content, human milk, 317
Phosphate
balance, in very low calorie diets, 14
pyridoxal deficiency, in sickle cell anemia (human), 235
Phospholipid composition, breast milk, term and preterm, 1103
Phosphorus
effect on zinc metabolism in man, 1213
metabolism, effect of calcium (human), 219
Phytate, effect on zinc absorption, in men, 1071
Phytoestrogen, equol, and soyaprotein (dietary), 569
Plasma fatty acid, 1-year self-selected diet study, 1345
Plasma glucose, seasonal variation, Beltsville study, 1352
Plasma insulin response, effect of wheat bran, in humans, 1023
Plasma lipids, response of cyclists to diet lipids, 360
Plastic, drug losses to (vitamin A), 8
Population, demographic and anthropometric, colon cancer, 887
Potassium
and sodium intake, balance (human), 786
dietary, and blood pressure, 1-year study, 1390
Poultry, mechanically separated, protein digestibility and bioavailability of amino acids, 704
Pregnancy
effect of maternal zinc, iron, folic acid, and protein, 496
effect of zinc supplementation (human), 508
energy expenditure, respiratory quotient (human), 1258
teenage, effect of adolescent growth on newborn weight, 801
vitamin D levels, in Bedouin women, 1290
vitamin D_2-supplemented, 1057
Premature birth, maternal vitamin A deficiency (human), 794
Prostaglandin formation, effect of linoleic acid intake (human), 763
Protein
and amino acid availability, 704
beef, comparison with plant protein, in young men, 982
consumption in U.S., by vulnerable groups, 685
deficiency in U.S., 685
diet, recovery from anorexia nervosa, 1137
dietary, and lipid absorption, 1156
-energy relationship, 685
intake, self-selected diets, Beltsville study, 1361
loss, severe caloric restriction, 611
maternal, effect on human pregnancy, 496
plant, comparison with beef protein, in young men, 982
quality
assessment of need for regulation, 685
current status of regulations, 685
regulation, meat and poultry, 675
requirements, for humans, 704
retinol binding
in thyroid disease, 26
relationship, dietary zinc, vitamin A (monkey), 199
single-cell, tolerance, nutritional value, of microfungal food (human), 285

Rat bioassays
protein efficiency ratio, 704
protein quality, meat and poultry products, 685
relative nitrogen utilization, 704
RDR assessment, vitamin A deficiency, Brazilian children, 1281
Refeeding
effect of exercise on body composition (rat), 1011
modification of weight gain by α-glucosidase inhibitor (rat), 270
Renal failure, nitrogen and potassium balance, 623
Renal function, effect of linoleic acid intake (human), 763
Resection
adaptation, small intestine, to free fatty acids, 1235
intestinal, copper absorption (rat), 528
Respiratory gas exchange, comparison, doubly labeled water method, energy expenditure (human), 153
Riboflavin requirements, effects of aerobic exercise, weigth loss, 553

School nutrition programs, requirement for national evaluation, 365
Selenium
metabolism
dynamics of (human), 208
in thyroid disease, 26
retention, restriction (human), 208
Serum cholesterol, response to dietary cholesterol (human), 351
Serum hexosaminidase levels, vegetarians and nonvegetarians, 949
Serum lipid
fecal composition and diet (human), 628
relationship to diet, Seventh-Day Adventists, 921
Seventh-Day Adventists
diet and colon cancer, 887, 896, 906, 914, 917, 921, 927, 931, 937, 942, 947, 949, 952, 957, 961
Sex, relationship to human red cell Na^+,K^+-ATPase activity, 339
Short bowel syndrome, trace element balance, 1038
β-Sitosterol, reduction in carcinogenesis, 927
Skeletal abnormality, infant, in zinc deprivation (monkey), 1192, 1203
Smoking, Caerphily heart disease study, 827
Social class, Caerphilly heart disease study, 827
Sodium
and potassium intake, balance (human), 786
dietary, and blood pressure, Beltsville study, 1390
Sodium bicarbonate, in patients with chronic renal failure, 623
Soy
-based and milk-based infant formula, iron absorption, 522
protein, effect on lipid absorption, 1156
Starvation, effect on sucrase regulation by sucrose (rat), 1017
Sterols, neutral, metabolism, vegetarians and nonvegetarians, 931
Sucrase regulation, effect of starvation (rat), 1017
Sucrose
dietary, effect of starvation on sucrase regulation (rat), 1017
digestion, effect of 3-day fast (rat), 758
Superoxide dismutase activity, thyroid disease, 26
Supplement, commercial dietary, effect on human performance, 586

Tea extracts, inhibition of Na^+,K^+-ATPase, 36
Tests, multiple statistical comparisons in nutritional research, 183
Tetanus toxoid, immunization with tetanus toxoid, protein-eneregy malnutrition (human), 131
Thermogenesis
diet-induced, measurement, in women, 542
early and late pregnancy (human), 1258
normal and obese men, 995
Thiamin deficiency, effect on intestinal functions (rat), 226
Thyroid disease, and zinc, copper, manganese, selenium metabolism, 26
Tin, effect on zinc absorption (human), 536
Tocopherol (*see also*, vitamin E)
in myeloproliferative disease (human), 95
Total body water/total body potassium ratio, anorexia nervosa, 260
Trace elements balance, in short bowel syndrome, 1038
Tracers, stable isotope, dynamics of selenite metabolism (human), 208
Triglyceride
long-chain, adaptation, small intestine, after resection, 1235
response, meal, rest or low-intensity exercise, 990
vegetarian diet, serum lipid changes, 468
Triiodothyronine, role in protein loss during caloric restriction, 611
Tropical sprue, absorption of nutrient energy (human), 771

Valine
(L-form) absorption, effect of growth retardation (rat), 1243
metabolism, regulation, stable isotope study, 1224
Vegetarians (*see* Seventh-Day Adventists)
Vitamin
commercial supplements, effect on human performance, 586
levels, Seventh-Day Adventists, 896
Vitamin A
assessment of status, by RDR, Brazilian children, 1281
cord serum, neonatal status (human), 794
decreased hepatic, after drug administration, 1131
deficiency
in children, survey, Brazil, 146
increased mortality rate, children, 1090
maternal, and premature infants, 794
losses of, to plastic intravenous infusion devices, 8
metabolism, effect of marginal zinc deprivation (monkey), 199
Vitamin B_6
deficiency
increase in xanthurenic acid (rabbit), 159
sickle cell anemia (human), 235
Vitamin B_{12}, in lactovegetarian diet (human), 325
Vitamin C
HDL levels, 1-yr Beltsville study, 1338
nutrition during prolonged lactation, 1050
Vitamin D
D_2 and D_3 metabolites in D_2-supplemented pregnancy, 1057

feto-maternal, Israeli Bedouins and Jews, 1290
Vitamin E
absorption and retention (human), 240
comparison of various forms, in rats and humans, 240
serum levels in children with corrected biliary atresia, 246
status in premature infants, 1078
uptake via LDL receptors, 747

Weight
birth weight-maternal weight-growth rate correlation, 1120, 1121
control, guidelines for professional programs, 865
loss, aerobic exercise, riboflavin requirements, obese women, 553
Wheat, comparison with sorgum, colonic function (human), 776
WIC program, effect on infant growth, 1250
Work capacity, reduced, in migrant boys, Southern Brazil, 135

Xanthurenic acid, quantification, high performance liquid chromatography (rabbit), 159
Xerophthalmia, vitamin A deficiency, and increased mortality, in children, 1090

Yogurt
and atherosclerosis (rabbit), 479
lactose malabsorption (human), 1219

Zinc
absorption
and phytate, in men, 1071
effects of iron, tin, and copper, in humans, 536
bioavailability
in infant formula, 1064
in premature infants, 72
presence in hair, efficacy of analysis, 840
deprivation
effects on vitamin A metabolism (monkey), 199
fetal and infant skeletal effects (monkey), 1203
growth retardation, 1192
dietary status, healthy elderly people, 1096
effect of calcium and phosphorus (human), 1213
effect on copper status (human), 743
maternal, effect on human pregnancy, 496
metaboism, in thyroid disease, 26
plasma concentrations, formula-fed infants, 1304
serum levels, versus other blood constitutents, human pregnancy, 508
supplementation, and outcome of pregnancy (human), 508
